

The stencils designs in this document are a continuation and development of the stickers. The stickers take a while to make, are fairly expensive in terms of ink and paper, and can be easy to remove.

The stencils are simple, quick to use and look very graphic. Print the designs on to paper or card, cut out the black bits, draw through it onto stencil card (available from art shops), cut out the design, and hey presto! - mobile detournement can be yours!
